PROFILE

- Full Stack Developer with 5+ years of web development experience, including 4 years of full-stack development using C#, ASP.NET Core, Angular, and SQL Server.
- Experienced in building RESTful APIs and database-driven applications with ASP.NET Core, .NET Web API, and ASP.NET MVC.
- Developed and integrated 30+ APIs for the PilotBird insurance analytics platform, mainly developing, maintaining, and improving the Workbench and Utility modules.
- Designed and built EMyShop from scratch, an e-commerce and inventory management platform, covering architecture, frontend, backend, core business modules, and 50+ APIs.
- Hands-on experience building responsive web applications using Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, and Tailwind CSS.
- Experienced in SQL Server, database integration, stored procedures, data management, and query optimization.
- Familiar with Clean Architecture, Repository Pattern, SOLID principles, dependency injection, and CQRS concepts. Hands-on with JWT authentication, ASP.NET Core Identity, and role-based authorization.
- Exposure to Microsoft Azure, Docker for running .NET applications, and CI/CD concepts for deployment and automation.
- Skilled in frontend-backend integration, debugging, API performance optimization, UI improvements, and application maintenance.
- Comfortable discussing requirements, clarifying issues, giving project updates, and communicating with clients and team members.
- Available for immediate joining and interested in Full Stack .NET + Angular, .NET Developer, and Angular Developer opportunities.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core, .NET Web API, ASP.NET MVC, Entity Framework Core, LINQ, Dapper, MediatR
Frontend: Angular, TypeScript, JavaScript, RxJS, React (UI maintenance), HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, jQuery
Database: Microsoft SQL Server, MySQL, Stored Procedures, Indexing, Query Optimization, Excel Bulk Import
Architecture: Clean Architecture, Repository Pattern, CQRS concepts, SOLID Principles, Dependency Injection
Authentication: JWT, ASP.NET Core Identity, Claims-based and Role-Based Authorization
Integration: REST API Integration, Google Maps API, DevExpress
Tools: Git, GitHub, GitLab, Visual Studio, VS Code, Docker (running .NET APIs), AI-assisted development (ChatGPT, Claude, GitHub Copilot, Cursor)
Cloud & DevOps: Azure (fundamentals), CI/CD (fundamentals)
Other: WordPress Theme Development, Responsive Web Design

EXPERIENCE

Freelance / Personal Project Developer May 2026 – Present | Navsari, India

EMyShop – E-commerce & Inventory Management Platform
Technologies: *Angular, ASP.NET Core Web API, SQL Server, and Microsoft Azure.*

- Designed and developed a personal e-commerce and inventory management platform from scratch using Angular, .NET Core Web API, SQL Server, and Microsoft Azure services.
- Built 50+ APIs to support application functionality and frontend-backend integration.
- Completed core modules for product, category, inventory, customer, and order management.
- Implemented authentication and authorization to control application access.
- Developed dashboard and reporting features to present business information.
- Continued improving application functionality and integrating frontend screens with backend APIs.

Full Stack Developer – Angular & .NET May 2025 – April 2026 | Surat, India
MegaMinds Tech Private Limited

PilotBird – Insurance Analytics Platform (USA, UK & Canada markets)
Technologies: *Angular, ASP.NET Core Web API, SQL Server*

- Developed and maintained frontend screens and backend APIs, including 30+ REST APIs using ASP.NET Core.
- Worked mainly on the Utility and Workbench modules, focusing on UI development and frontend-backend integration.
- Implemented customer data processing, verification, and publishing workflows.
- Developed review and verification screens to support customer data validation.
- Investigated application issues and supported production fixes.
- Worked with 5 developers, 1 Team Lead, and 1 Project Manager.

Freelance Development September 2024 – April 2025

Atual Trader – Wholesale Trading & Inventory Management Web Application

Technologies: *ASP.NET Core MVC, SQL Server*

- Developed a web application to support wholesale trading and inventory management.
- Implemented features for managing product details, stock information, and inventory records.
- Developed functionality for managing vendor activities and product information.
- Supported business operations through centralized product and inventory management.
- Optimized API response time from approximately 2 minutes to 2 seconds, and improved page loading through page optimization and UI redesign.

Full Stack Developer – Angular, React & .NET Apr 2022 – Sep 2024 | Navsari, India

Vision Infotech

Technologies: *Angular, React, ASP.NET Core MVC, .NET Web API, SQL Server, DevExpress*

GHI Portal – Chimney Repair Service Management System (USA operations)

- Developed screens and APIs for a service management system used by agents and their employees.
- Built service management workflows to handle service requests.
- Integrated Google Maps API for location tracking and service validation.
- Developed dashboards and reports using DevExpress BI Dashboards, Report Viewer, and data grids.

Cloud Labs – Event Management Web Application

- Developed and maintained features for an event management application supporting 40+ events.
- Implemented user registration and automated email notifications for event updates.

Amazon Tools – Data Analysis and Calculation Application

- Developed application features for data analysis and calculations.
- Implemented Excel bulk data imports into SQL Server, supporting more than 10,000 records.
- Improved multi-record data insertion and organized data access using the Repository Pattern.
- Implemented user and role-based access management.

AquaFish – Fish and Aquarium Accessories E-commerce Application

- Maintained and enhanced an existing e-commerce application for fish and aquarium accessories.
- Worked on product listings, product details, and category functionality.
- Optimized pages and APIs to improve application responsiveness.
- Investigated and fixed API-related bugs and application issues.
- Implemented responsive UI improvements and SEO-friendly enhancements.

Hana – Flower Sales and Vendor Management Web Application

- Maintained and enhanced an MVC-based application for flower sales and vendor management.
- Worked on vendor and customer management, flower/product management, and order and sales workflows.
- Developed new features and fixed application issues.
- Resolved UI design issues and implemented updated designs based on project requirements.
- Improved page-loading performance and user experience.

Web Designer / Frontend Developer April 2021 – March 2022 | Navsari, India

Goldenmace IT Solutions

Technologies: *WordPress, HTML5, CSS3, JavaScript, Tailwind CSS, Responsive Web Design*

- Designed and developed responsive websites and WordPress themes.
- Developed 20+ premium WordPress themes sold on ThemeForest.
- Created responsive layouts and improved website usability across different screen sizes.

EDUCATION

Bachelor of Computer Applications (BCA) | CGPA: 7.24 — Naranlala College of Professional and Applied Science, Navsari (2016–2019)

Languages: English, Hindi, Gujarati
